

Corporate & Social Responsibility

Protect the Earth, its creatures, and their habitats.

Our role at American Regent extends beyond manufacturing products that help change and save lives.

As citizens of the world, it's important we do what we can to protect the Earth, its creatures, and their habitats.

Our mission is to make a positive difference in the communities where we live and work. We don't do it because others expect it of us, but because we expect it of ourselves. More than that, our people are empowered to strengthen their skills and build a career path, and can customize what, how, and where they learn with the latest technologies and tools. By investing in our people, we want them to feel supported and encouraged to do their best, and inspired to be their authentic self.

We  Greater Together

Our role at American Regent extends beyond manufacturing products that help change and save lives. As a responsible corporate citizen, we want to make a positive social impact. We support many professional and patient organizations as well as charities, and are grateful to our employees who share in our commitment.

Our activities help improve food security for families and ensure equitable access to nutritious food; help alleviate human suffering in the face of emergencies; support advocacy programs and services; support sustainability programs; keep families together by providing them with goods and services so they can become more self-sufficient over time; fulfill social service, and education needs; and conduct community outreach.

We make a difference—together!
